

Lab01 has 3 questions:

1. At the beginning, I try to follow sophisticated example but I don't know how to css my photo overlap background image. So I gave up and back to follow basic example and I was completed it.

2. I was successful creating test repository on my current Github account. I did not used Github desktop. I uploaded test.txt on GitHub directly

Link: <https://github.com/vuongtrian/myFirstRepo>

3. I was successful creating my html page and upload index.html, style.css and avatar.PNG. But index.html can't read image in the same repo. Sometime it work but most of the time it does not work. And I can not pass validation my HTML, I don't know how to pass it.
