Lab02
I created about.html and style.css file which following requirements. My page is 90% similar with the picture.
I try to make it simple and display the website, layout, color, text to be match with requirements as much as possible.
I skipped advanced styles and I will try to add it if I have time.

Recipes
My page & style is 90% similar. The padding and margin may not exactly same with the picture
It is easy to create a list but I feel it is not best practice if we add complex css to the page.
The copyright section is not same and I don't know how to be more beautiful as picture.
